

Habib

Website Lead | Freelance Web Developer

Barishal, Bangladesh | contact@habibur.pro | habibur.pro | linkedin.com/in/habiburwp

PROFESSIONAL SUMMARY

Web developer with 8+ years of experience who genuinely cares about the work. I build clean, purposeful websites for service-based businesses and nonprofits, the kind that actually serve the people using them. From scoping to launch, I handle the full process: architecture, development, client communication, and delivery. I've worked with clients across the UK, US, and beyond, built custom WordPress plugins from scratch, and led website projects at agency level. Good work, honest communication, and real results. That's what I show up for.

EXPERIENCE

Web Developer | MX Studio

Jul 2026 - Present | Brisbane, Australia (Remote)

- Work as a full stack web developer for MX Studio, covering WordPress theme and plugin development alongside web design.
- Deliver client projects including an e-commerce site and the Meridian Camera website.
- Coordinate with the studio through email and Figma for design handoff and project scope.

Website Lead | Barakah Agency

2023 - Present | Los Angeles, California (Remote)

- Lead end-to-end website projects for agency clients, from discovery and scoping through design, development, and handover.
- Manage client communication, set project scope boundaries, and deliver on agreed timelines.
- Collaborate with agency leadership on revenue-sharing project models.
- Handle web development and UX across service-based and nonprofit client websites.

Freelance Web Developer | Independent / Fiverr

2019 - Present | Remote

- Built a fully custom WordPress booking and payment plugin for Babyccinos (UK), a children's leisure centre requiring peak/off-peak pricing, session management, and integrated payment handling.
- Delivered business websites, e-commerce stores, and landing pages for clients across the UK, US, and beyond.
- Evaluated and recommended appropriate tech stacks (WooCommerce, Amelia, custom PHP) based on client requirements.
- Handled scoping, architecture planning, delivery, and post-launch support independently.
- Active on Fiverr (fiverr.com/wp_boss_) with a track record of direct client project delivery.
